RE: Groundwater Data Gaps Work Plan Extension Request, Modine Manufacturing
Company, Camdenton, Missouri, EPA ID#: MOD062439351

Dear Mr. Sanicola:

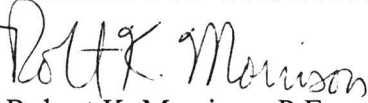

The Missouri Department of Natural Resources' Hazardous Waste Program has reviewed Modine's November 28, 2001, request for an extension for submittal of a work plan to address data gaps with respect to groundwater contamination in the area.

The department appreciates Modine's efforts towards remediation of contaminated soil at the facility and understands that due to the expansion of the scope of the soil remediation project that additional time and resources are necessary to properly evaluate and remediate the soil contamination at the facility. In accordance with the Corrective Action Abatement Order on Consent (Order No. 99-HW-002) for Modine Manufacturing Company, the department grants the requested extension for an additional 180-days from the date of Modine's November 28, 2001, letter for submittal of a work plan addressing the data gaps with respect to the groundwater contamination in the area. In the meantime, the department expects Modine to continue advancing towards completion of the soil remediation project.

If you have any questions regarding this letter, feel free to contact Christine Kump, P.E., of my staff at (573) 751-3553.

Sincerely,

HAZARDOUS WASTE PROGRAM

Robert K. Morrison, P.E.
